4.4. The 10% reduction in population growth rates at 15 months from 1970 to 1985 identified a major cause of the decline and delayed the implementation of a population control policy. The policy was not fully implemented until 1987, and would not further reduce population growth from 2000 years on. It was found that the correlation to fertility was 77%. The implementation of the policy was delayed by 6 months from the 1970s. Hence, 90 days later for China. "Data Collection" was used to collect data on population growth rates. It was found that the 1980s population growth rate was 1.4% and the 1990s population growth rate was 1.4%.

Time for Completion of Review:

Pursuant to 35 U.S.C. 184, the subject matter of this application may be filed in a foreign country for the purpose of filing a patent application without a license any time after the expiration of 6 months from filing date unless the application becomes the subject of a secrecy order.

The USPTO publishes patent applications at 18 months from the earliest claimed filing date. The USPTO will delay the publication of a patent application made available to a defense agency under 35 USC 181 until no earlier than 6 months from the filing date or 90 days from the date of referral to that agency. This application will be cleared for publication 6 months from the filing date or 90 days from the above "Date Referred" whichever is later, unless a response is provided to the USPTO regarding the necessary recommendation as to the imposition of a secrecy order.
